ABRIDGED

ANNUAL CATALOGUE

OF

HOT-HOUSE AND GREEN-HOUSE PLANTS,

FRUIT AND ORNAMENTAL

TREES, SHRUBS, &c. &c.

CULTIVATED AND SOLD

AT THE OLD ESTABLISHED NURSERIES,

LATE OF

D. & C. LANDRETH,

FEDERAL STREET NEAR THE ARSENAL,

(CITY OFFICE, 65 CHESNUT STREET,)

PHILADELPHIA.

Philadelphia:

PRINTED BY STAVELY & McCALLA,

No. 12 Pear street.

1845.

ADVERTISEMENT.

The popularity of this establishment for over half a century, and the support which has been extended it by every section of the Union, but especially the Middle, Southern and Western States, would seem to render appropriate some expression of our thanks on the issue of another edition of our Catalogue; which at the same time, affords opportunity to make known our determination to do as we always have—consider the purchaser's interest and our own as nearly connected.

The collection existing at the Nursery is now so diversified that a catalogue in detail would be too voluminous for general distribution, and we have been compelled therefore to confine the present edition to the more prominent articles, and those of general interest. Purchasers of rare plants will find at our establishment a large collection, not included herein, which they are invited to examine.

The fruit department contains a careful selection, purposely limited in variety, of the more desirable fruits; and additions are annually made of such new ones as prove worthy. The utmost vigilance is exercised in preserving the respective varieties distinct—all the trees being “worked” under ~~their~~ personal inspection; purchasers may therefore rely on obtaining the identical variety represented.

The prices for Ornamental Trees and Plants have been greatly reduced. Where the prices vary, it is in consideration of size, form, &c.; in such cases the order had better indicate the cost. To obviate misunderstanding, it may be proper to premise that no care will be spared in the removal and package of all orders intrusted to us, but no responsibility will be incurred as to their safe carriage or ultimate success.

The terms are CASH, or RESPONSIBLE City reference.

✂ *A liberal discount allowed to wholesale purchasers.*

D. LANDRETH & FULTON.

Philadelphia, July, 1845.

PLANTS FOR HEDGES.

Arborvitæ, *chinese evergreen*....1 foot high \$10 per hundred
do *American do*....1 " do. \$10 do. do

*MACLURA AURANTIACA, <i>osage</i>	{ 1st. size \$12 50 per thousand } { 2nd size \$10 00 do. do. }	{ two years old }
orange.....		

* This plant is now attracting much attention throughout the country, and will certainly supersede all others for hedging, it grows rapidly, and if regularly clipped at midwinter and midsummer respectively, will, in a few years, make a compact impenetrable fence; the rich glossy green of the foliage (*which it retains longer than any other deciduous tree*) makes it very ornamental, and the numerous strong, rigid thorns with which it is armed, is a certain preventive against depredation.

It delights in a moderately rich soil, and one foot apart is the proper distance for planting. The maclura is undoubtedly the cheapest hedge plant that has been introduced into cultivation.

PÆONIAS.
